# INTRODUCTION

Welcome to Job Sprout, an app we designed and created to fit the needs of young adults when it comes to applying for a job or internship. Our app is dedicated to the youth audience of today and is also meant to guide teens on how to form their own resume.

Project Duration: January 2023 - Present

# Confronting Conflicts

## ! The social issue:

- For this app, we have decided to face the complications of young adults not being properly guided in how to create resumes for themselves and how to scout for jobs or internships when needed. As teens ourselves we understand the struggle of finding a job as we have experienced it ourselves along with our peers.

## ★ The Goal:

- We strive for making these issues more easier and accessible for people who are still early in age and don't know where to start when it comes to preparing their personal records for future occupations.

A Sapling Production

Welcome

**JOB SPROUT**

# User Research\Background!

- After conducting real life research with a student survey, it is displayed that 68.7% of students are in the midst of looking for a job. This type of information inspires us to continue to develop an application that makes searching for a job easier and simpler!

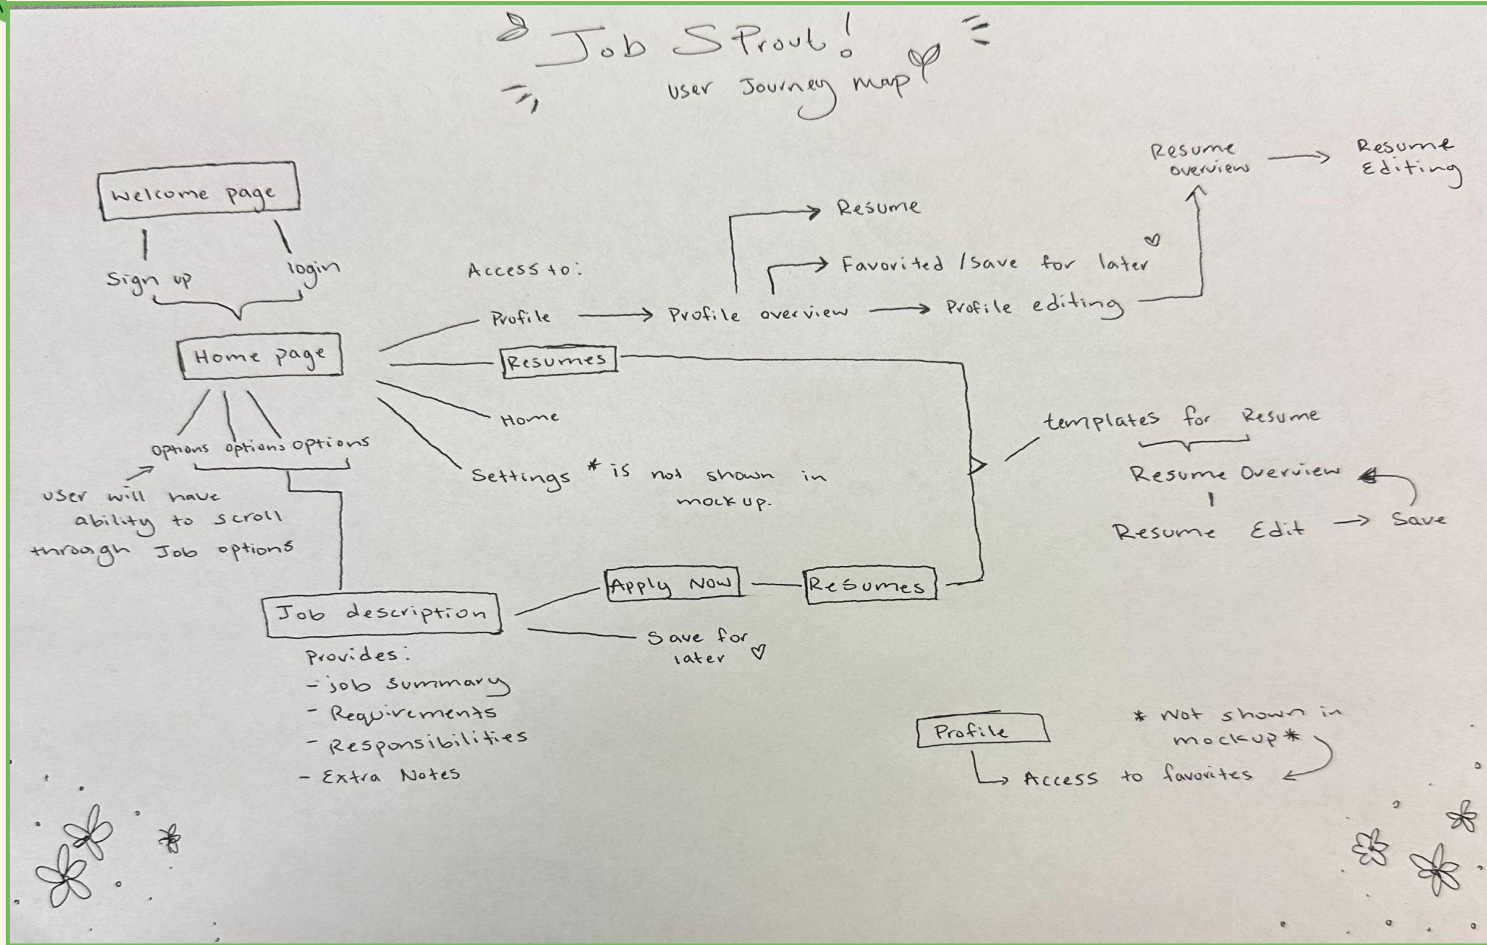

**Are you currently managing a job or some sort of work?**

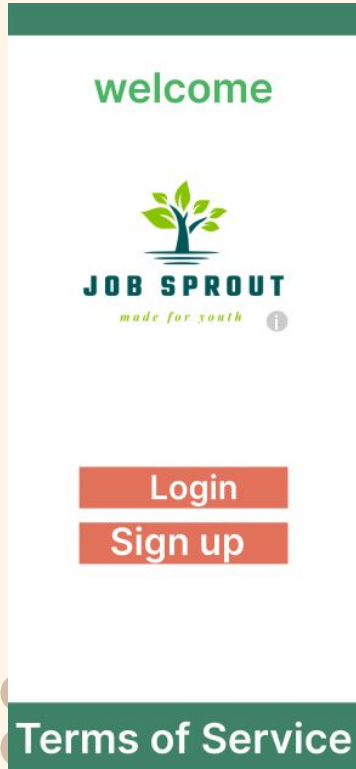

**Are you currently looking for a job or planning to get one in the next six months?**

# Accessibility considerations

1

It's important to consider the needs of individuals with visual impairments.

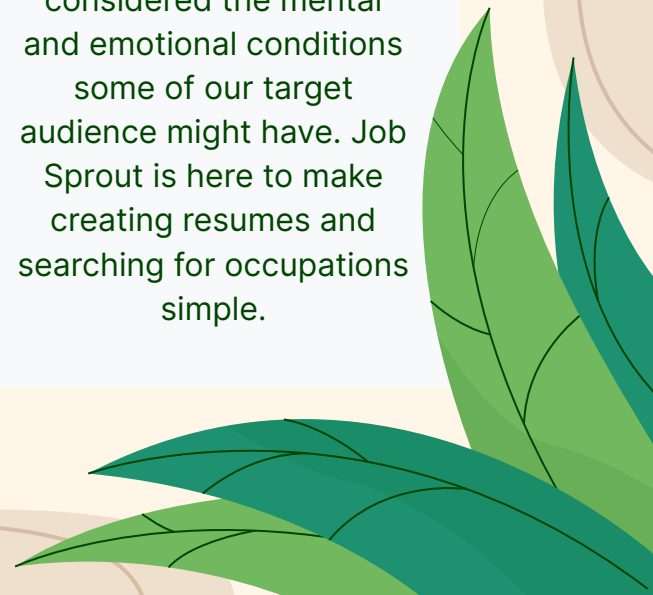

Our app design specifically includes the ability to moderate text size in the settings feature of our application.

2

Our application interface will be catering for people who have difficulty with cognitive impairments. We minimized distractions as much as we can in the design of our app and use clear and concise language. Not to mention we've also steered clear of any flashing and blinking elements.

3

We as a team have considered the mental and emotional conditions some of our target audience might have. Job Sprout is here to make creating resumes and searching for occupations simple.

# Takeaways

## Impact:

The impact we wish to tackle with this application is to lessen youth unemployment amongst teens and support them while applying for occupations.

## What You learned:

Our app can help you get the tips you need to get the job you want.

The background is a light beige color with decorative elements. In the top-left corner, there are large green leaves. In the top-right corner, there is a small branch with green leaves and a cluster of brown dots. In the bottom-left corner, there is a cluster of brown dots and a small branch with green leaves. In the bottom-right corner, there are large green leaves.

## Next Steps:

We would like to expand our project to be more universal and is beneficial to all teenage audiences, defeating the language barrier. We would also like to work on other features such as downloading resumes and saving login/signup information.

The background is a light beige color. It features several decorative elements: green leaves on thin black stems in the top-left, top-right, bottom-left, and bottom-right corners; and clusters of brown dots in the top-left, bottom-left, and bottom-right corners. The dots are arranged in small groups, some with two dots in a row and others in a 2x2 grid.

**THANK  
YOU!**
